SUMMARY

Full stack developer with extensive computer experience in graphic design and recording engineering software. Recent graduate of the UCSD extension coding bootcamp. Musician of twenty years with a love for attention to detail. A lover of a nice, polished GUI.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, jQuery, Bootstrap, node.js
Applications: Visual Studio Code, Git, Adobe Photoshop, Excel, Scratch

PROJECTS

My Secure Password Generator:
https://github.com/Deftone1/-my-secure-password-generator
https://deftone1.github.io/-my-secure-password-generator/

This assignment gave us the opportunity to create a random password generator with very precise stipulations about character length, different types of characters used, and upper/lowercase choices. The project helped us understand how arrays and for loops can be helpful in this case.

The main languages used were HTML and more importantly, Javascript.

EDUCATION

Bootcamp Certificate: Trilogy Coding Bootcamp, UCSD Extension, 2020
Degree: Associates, Musical Theory and Performance / Santa Barbara City College, 2008
